# EDIsecure<sup>®</sup> PROFESSIONAL LINE

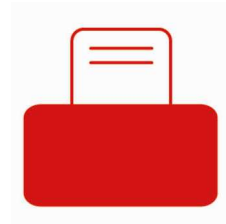

---

## EDIsecure<sup>®</sup> PROFESSIONAL LINE

### The perfect solution for highly secure and high-volume operations

- Professional retransfer printers for high speed ID production
- Prevent card fraud with scalable security options
- Various optional external modules available

## **What is the visionary concept of the new Professional Line?**

- Based on the well-proven XIDie Printer Series and ILU Laminator with all existing encoding options and ACEF, with a new housing color
- USB and Ethernet\*
- IPSec V.4 and V.6\*
- All ribbons are supported as per the current program
- Mechanical locks for utmost security of cards and materials (Lock codes can be selected by the customer, either one code for both doors, or different ones. Up to 5 different combinations)
- Optional lockable card stacker for 100 cards
- Modularity by various optional external modules
- Optional lamination with ILM and ILM-DS\*
- Field upgradeable from XID 9300 to XID 9330

# XID 9300 RETRANSFER PRINTER

**EDIsecure**® XID 9300 Printer

---

## XID 9300 RETRANSFER PRINTER

---

### High performance, for personalization of smart cards and secure ID cards

- Rugged, industrial design with compact shape for heavy-duty use
- Mechanical locks to secure access to cards and materials
- Optional lockable card stacker for 100 cards
- Double-side printing on a variety of card materials (PVC, PVH, ABS, PET, PC)
- Supports 5 different ribbon combinations incl. UV Printing
- Detachable card drawer and colored cartridge system
- Ideal for printing and inline encoding of smart cards or Magnetic Stripe cards
- Optional single- and double-sided lamination for more durability and security
- 120 cards per hour

## XID 9300 RETRANSFER PRINTER

- Diverse security features: Dye-sublimation UV ink ribbon, IPsec, and Security Erase
- Heavy-duty ART Retransfer Film for long-lasting durable cards
- Various optional external modules
- Printer Look-Up Tables and pre-selection of 5 different card type profiles
- Automatic ribbon detection and low ribbon warning
- Auto cleaning notification
- Admin Center and Media Status Monitor to manage and handle printer settings from PC
- Built-in operating panel with LCD for convenient set-up and operation
- Print head has no contact with card, minimizing risk of damage

## XID 9300 RETRANSFER PRINTER

- Removable cleaning roller unit for long-term use and reliable, steady card cleaning
- Field upgradeable encoder options
- Inline operation of printing, encoding and lamination reduces total personalization time
- Intuitive, in-house developed printer driver for utmost user convenience and productivity
- USB 2.0 and Ethernet LAN interface for easy connection with PC or network
- IPsec V.4 and V.6\* for encrypted data transfer through network
- Field upgradeable to higher versions

# XID 9330 RETRANSFER PRINTER

**EDIsecure**® XID 9330 Printer

---

## XID 9330 RETRANSFER PRINTER

---

### **The industrial card printer for high-volume card personalization**

Supports all features of the XID 9300, plus:

- Advanced IPM for high-capacity card production and flexibility on varying workloads (up to 7 printers) providing 840 cards per hour, more under Ethernet\*
- Can be integrated within an LCP 9000 configuration
- Can be combined with an HPM 9000 Module

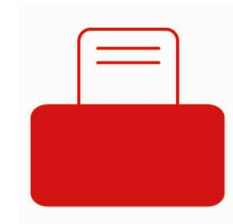

\* in preparation

# XID 93xx RETRANSFER PRINTER

## VARIOUS OPTIONAL EXTERNAL MODULES

- Contactless encoders
- CSM 2 Credential Scanning Module
- Lamination modules for single- and double-side lamination
- Laser Engraving Unit for Laser Color Personalization (XID 9330 only)
- HPM 9000 Holographic Personalization Module\* (XID 9330 only)
- Optional lockable card hopper
- High-capacity Card Feeder / Collator\*

\* in preparation

# CONTACTLESS ENCODERS

## Contactless Encoder Housing for XID 93xx

Robust housing with space provides for optionally built in of contactless encoder modules (e.g. Mifare, DESFire, Legic, HID, etc.)

## CSM2 CREDENTIAL SCANNING MODULE

### **EDIsure<sup>®</sup> Credential Scanning Module**

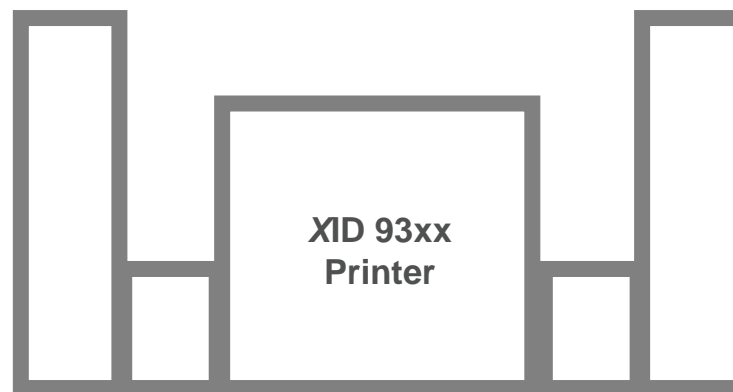

Allows the scanning of ID cards with optional OCR recognition as well as the reading of barcodes on pre-printed cards.

Robust housing and ample space provides for optionally built in of even contactless encoder modules (e.g. Mifare, DESFire, Legic, HID, etc.)

## MULTI-CARD FEEDER AND COLLATOR

### High-Capacity Card Feeder / Collator\*:

- Attachable modules for XID 93xx Printers
- Allows to process at least 600 cards
- Allows to process two different card types
- Ideal for high-volume applications and card service bureaus
- Card feeders & stackers are completely lockable on both input- and output-side

# CARD LAMINATION MODULES

**High-speed lamination to extend durability and security**

---

# ILM LAMINATOR

---

## What is new?

- Remodeled for the new Professional Line
- Mechanical lock (inside front door). Up to five different lock codes
- Optional lockable card hopper (from XID 93xx)
- Different housing color
- Lamination module for the XID 93xx Series for single-side lamination or double-side lamination when using the optional flipper

## ILM LAMINATOR

- Fast and most compact card laminator in its class due to portrait mode lamination
- Single- and double-sided lamination possible
- Highest positioning accuracy through adjustable laminate position in all 4 directions
- High capacity lamination foils (patch and overlay) reduce operator interaction
- “Jumbo Patches” provide for almost up to the edge lamination of durable patch materials
- Enables user to apply a range of *EDlsecure*<sup>®</sup> clear and secure laminates that extend card life and enhances security

---

## ILM LAMINATOR

---

- Custom design and generic holographic foils are available to combat fraud and counterfeiting
- Space saving, compact design
- Card lamination single- or double-sided (option)
- Flexible adjustment of temperature and speed settings (via front panel display)
- User-friendly front-loading of supplies with quick change of the laminate cartridge

---

## ILM LAMINATOR

- “Feed through option” programmable through front panel display to provide for the temporary passing of cards which shall not be laminated
- A significant number of *ED/secure*<sup>®</sup> clear and secure laminates is available
- Field upgradeable for use with all *ED/secure*<sup>®</sup> XID 93xx Retransfer Printers

---

# ILM-DS LAMINATOR

---

**Double-side laminator with small footprint**

# ILM-DS LAMINATOR

## What is new?

- New double-side laminator with small footprint primarily developed for the XID 8300 Printer
- ILM-DS can be also used with the XID 93xx Series\*
- ILM-DS for fast simultaneous dual side inline lamination
- Electronic security lock, controlled by the PC
- Controlled via cable through the PC
- DISO unique housing, adjustable lamination positioning, exclusive jumbo-size patches
